Concept

What is the trend of the quantity of checked out books whose topic is about these four popular--sports, football, basketball, baseball and ice hockey?

By execute the SQL sentence, we can get the total number of books checked out from 2006-2013 and group them by month and year so that we can see the overall trend of the popularity of these four sports in Seattle.

Query

```
select month(cout) as 'Month', year(cout) as 'Year',
    sum(case when(`subject`.`subject` like '%basketball%') then 1 else 0 end) as
'Basketball',
    sum(case when(`subject`.`subject` like '%baseball%') then 1 else 0 end) as
'Baseball',
    sum(case when(`subject`.`subject` like '%football%') then 1 else 0 end) as
'Football',
    sum(case when(`subject`.`subject` like '%hockey%') then 1 else 0 end) as 'Ice
Hockey'
from inraw, `subject` where inraw.`bibNumber`='subject`.`bib`
group by year(cout), month(cout)
order by year(cout), month(cout) asc;
```

Data

Month	Year	Basketball	Baseball	Football	Ice Hockey
1	2006	1261	2255	997	159
