

We will be using [MySQL Workbench](#) to retrieve SPL data from the database.
This is available for all platforms: Mac, Windows & Linux

Accessing the database with your MySQL client

Host: tango.mat.ucsb.edu

User: mat259

Password: V1sual1zat1on

Database: (optional)

Port: 3306

Visualization software

Processing is cross platform and can be downloaded [here](#).

We will be using Processing v2.2.1

Optional: A library used to request directly from the processing sketch (not necessary for our projects as we will download to a csv file direct from MySQL to save processing time
<http://bezier.de/processing/libs/sql/>
