

Steps in Terminal for MAC users

```
$ ssh-keygen -t rsa
```

generate private and public rsa key pair

```
HIT <RETURN> KEY TO ACCEPT DEFAULT VALUES
```

```
HIT <RETURN> FOR ENTER PASSPHRASE
```

```
HIT <RETURN> TO CONFIRM
```

```
cd ~/.ssh
```

```
mv id_rsa.pub id_rsa_yourname.pub
```

rename the public key file

```
scp id_rsa_yourname.pub mat259@tango.mat.ucsb.edu:~/.ssh
```

copy the public key to tango.mat.ucsb.edu, in the .ssh directory in the mat259 user account.
