

# **Visualization Fundamentals**

## **Handbook**

George Legrady © 2024  
Experimental Visualization Lab  
Media Arts & Technology  
University of California, Santa Barbara

# **Lecture Topics (January 25, 2024)**

**Spatial Design & Basics (January 25, 2024)**

--

**Interaction Design (January 30, 2024)**

--

**Volumetrics, Time in Space, data to form, data density, cultural trends (February 6, 2024)**

# Lecture Topics (January 25, 2024)

Basics of Visual Language in 3D

Situating Data in space

3D visualization examples

How to give credit: code, data, refs, etc.

Exploratory Design process

# Basics of Visual Language in 3D

**Syntax:** a set of rules by which language is structured. In visualization this involves decisions in how to organize visual elements in space.

**Semantic:** The study of meaning. In what ways, does visual elements convey meaning? To what degree does changing the visual elements transform meaning?

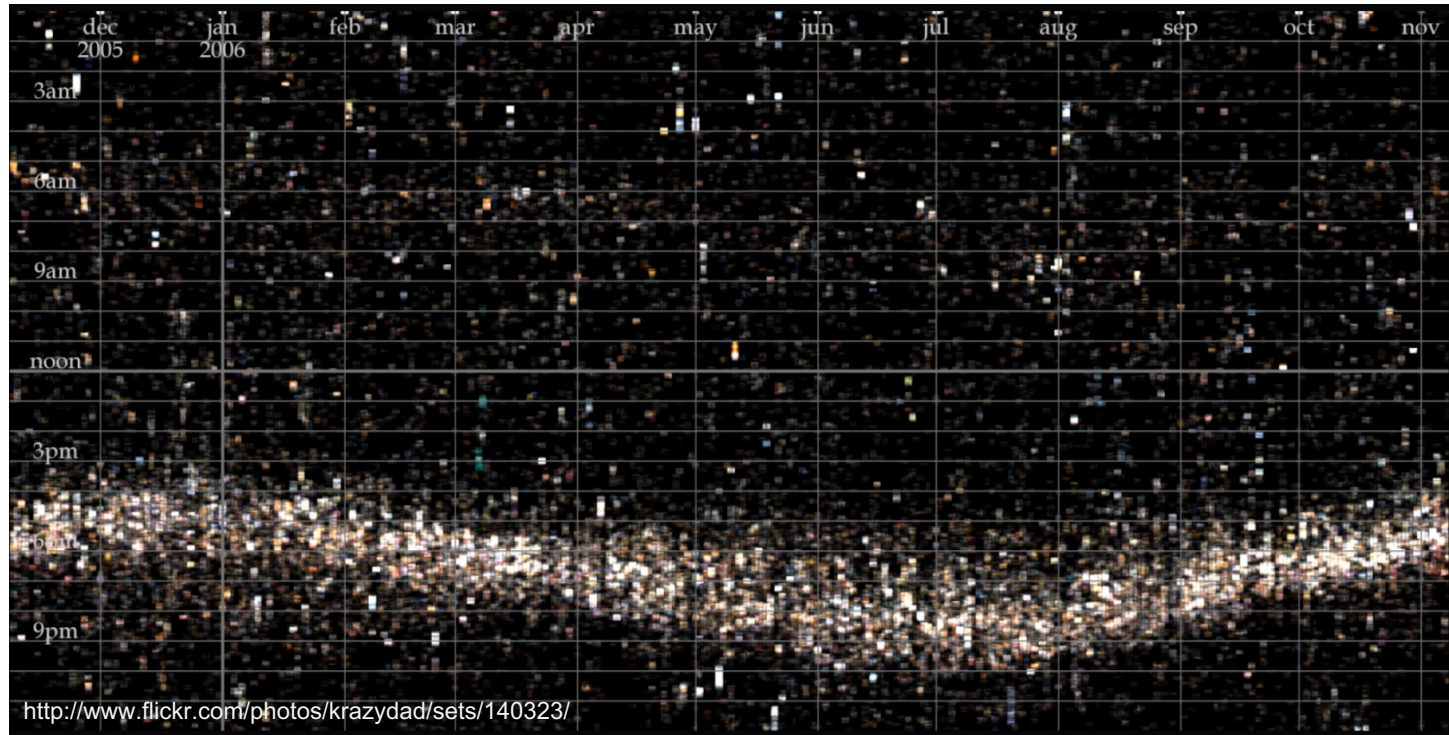

(Reference: Nelson Goodman, "Languages of Art", 1960)

# Rules in spatializing & organizing data

Use full screen 1920 x 1080 pixels for final version (use small screen during development)

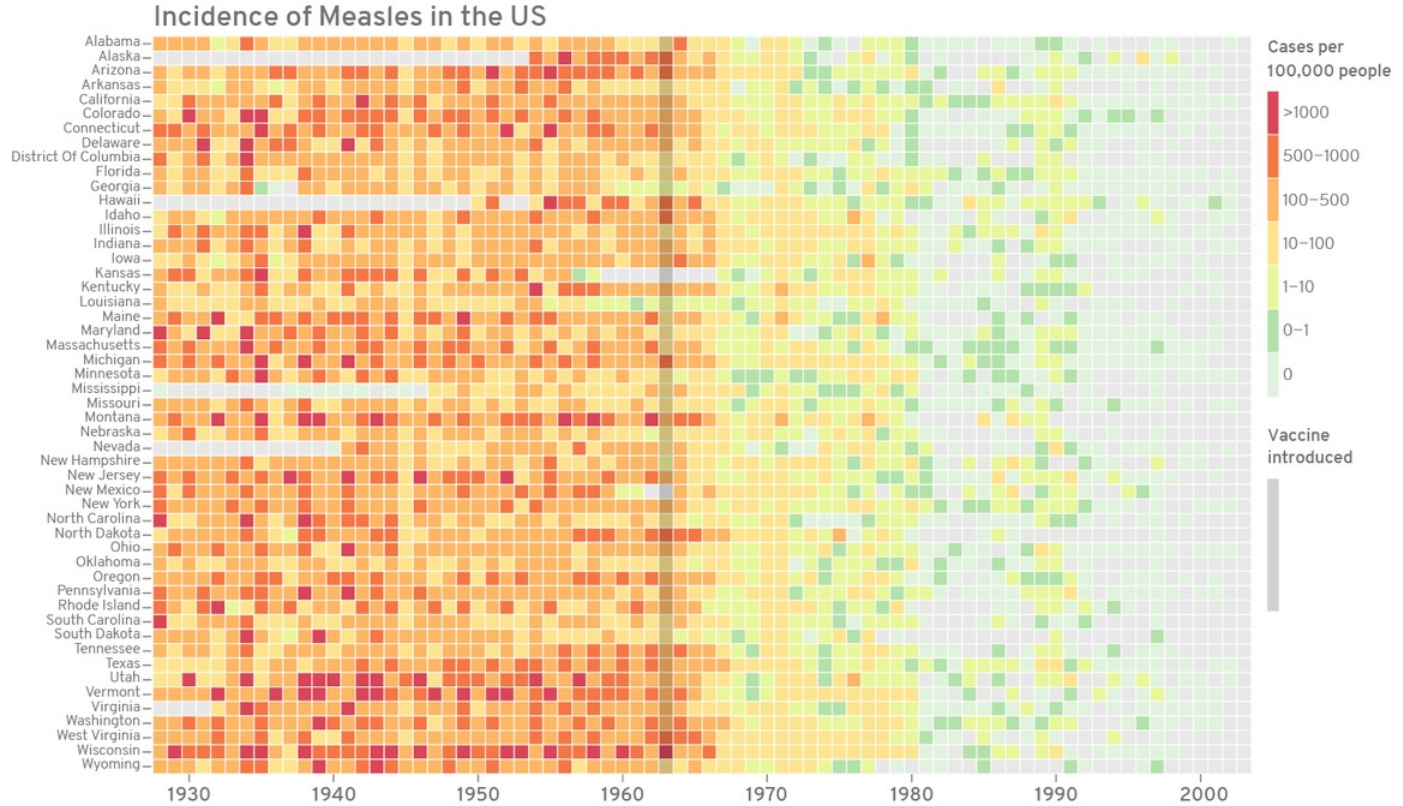

In 2D, subdivide screen (rule of thirds; or according to any set of rules)

In 3D, set of rules for x, y, z determine data location

# Color Coding: Example for positioning data according to a set of rules

Heatmap: Magnitude of phenomenon using color either by hue or intensity

# Visualizing ItemNumber over Time

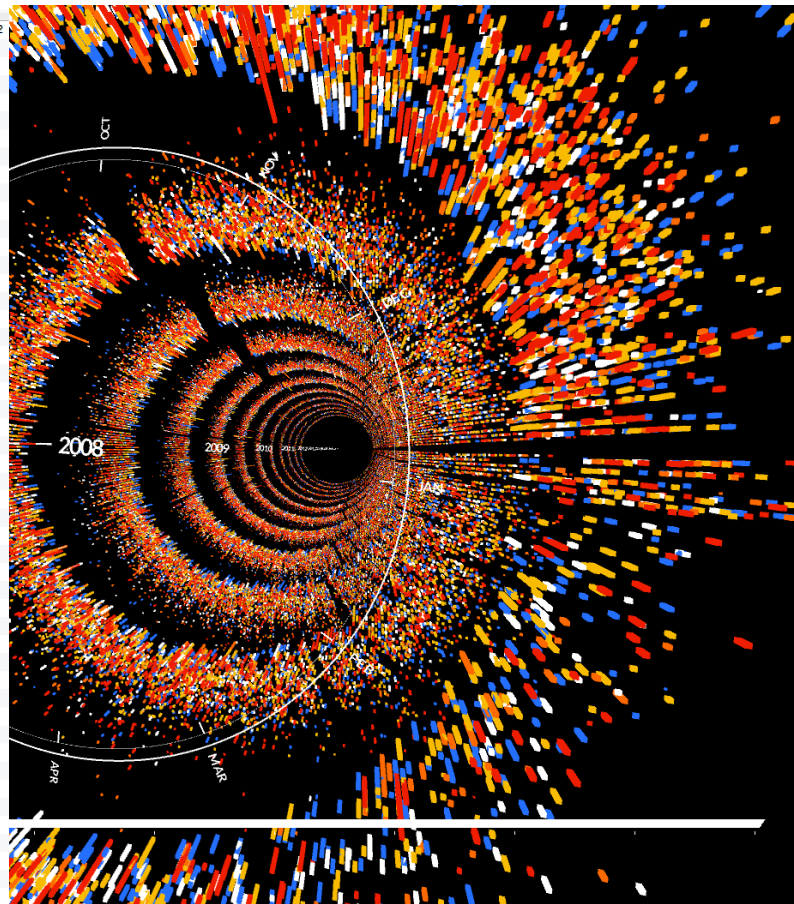

## Fundamentals in situating data in visual space

- 3D data placement requires horizontal (**x**), vertical (**y**) and depth (**z**) positions
- Location of data in 3D space may require some indicative marker (**color, scale, shape, etc.**)
- Interaction usually requires instructions through a menu

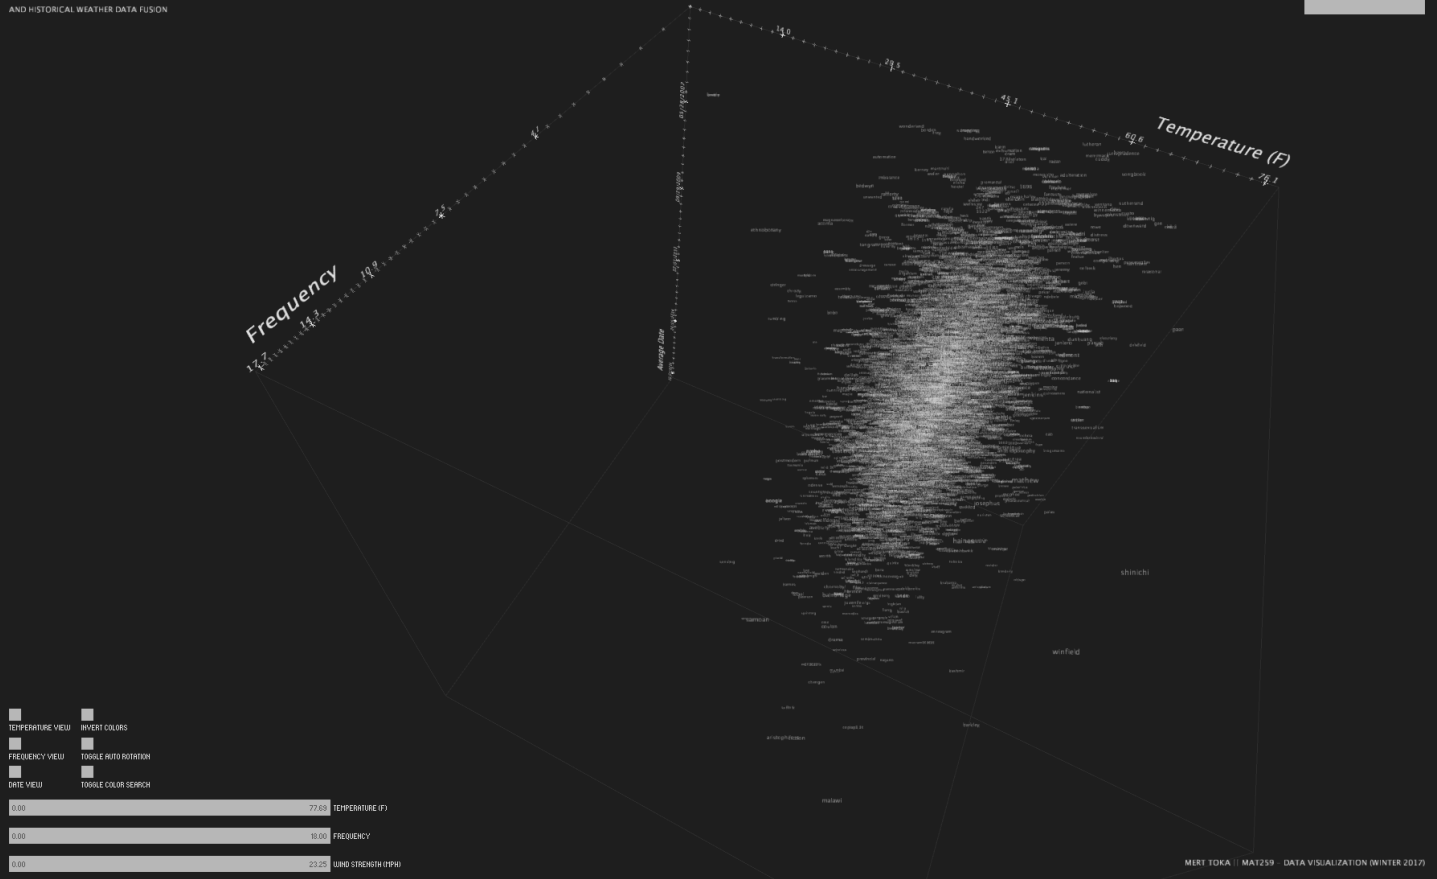

# Multi-variate data is given visual form

ItemNumber	cut	colcode	itemtype	barcode	title	callNumber	deweyClass

# Data in 3D space based on some rules, color, connecting lines, etc.

## Slow Readers of SPL

This project explores the duration of lengthy (>75 days) book loans in Seattle Public Library. The lines represent the duration of a book loan, the longer and wider the line, the more time the borrower reads the book. Diverging colors represent different branches, where the books are held

2 3D Visualization: Food & Drink Words  
3 Tested in Processing 3  
4  
5 Author: Chantal Nguyen  
6 Supervisor: George Legrady  
7  
8 Purpose: Visualizes words found in titles of Dewey 641 media at the Sea  
9 Library, projected into 3D space using t-SNE. Spatial proximity is dete  
10 analyzing the contextual similarity between words. Toggling options des  
11 allow the viewer to visualize the word co-occurrence network, where conn  
12 words are determined by the number of times two words co-occur in the s  
13 This represents a much more simplistic way of obtaining relationships b  
14 than word2vec + t-SNE.  
15  
16 Usage:  
17 1. A mouse left-drag will rotate the camera around the subject.  
18 2. A right drag will zoom in and out.  
19 3. A middle-drag (command-left-drag on mac) will pan.  
20 4. A double-click restores the camera to its original position.  
21 5. The shift key constrains rotation and panning to one axis or the ot  
22 6. Pressing C toggles color modes:  
23 [default] where color indicates frequency of the respective word, f  
24 (less frequent) to red (more frequent)  
25 [community] where points of the same color are within the same commu  
26 the word co-occurrence network  
27 7. Pressing 1 will make visible all edges between nodes in the word co-  
28 occurrence network. Pressing 2-9 or Q-P (corresponding to 10-19) wi  
29 the edge weight such that only edges with weight greater than or eq  
30 entered value will be shown.  
31 8. Pressing 0 will hide the edges (default view).  
32 9. Hovering over a node will show the corresponding label and the 20 c  
33 words.  
34 10. Search bar in lower right corner: type a word to highlight the corri  
35 and show 20 closest related words (if word does not exist in datase  
36 happen)
```

```
// borrowed from ChantalNguyen, 3D Visualization,  
// Food & Drink Words
```

```
cam.beginHUD();  
textAlign(LEFT, TOP);  
textFont(f, 40);  
fill(255);  
text(selectedWord.label, 10, 10);  
textFont(f, 20);  
fill(242, 186, 184);  
text(associationString, 7, 50);  
cam.endHUD();  
popMatrix();
```

# Selecting Colors: Best to limit to a maximum of 12 or black and white

## 2 modes in computing:

- RGB** (Red, Green, Blue) Additive system
- HSB** (Hue, Saturation, Brightness) // best to use this as you can control all colors hues (0-255), or saturation (0-255)

## Color Impact greatly depends on the relationships

- Colorpicker:** <http://tristen.ca/hcl-picker/#/hlc/6/1/20313E/EFEE68>
- HCL Wizard:** <http://hclwizard.org/hclcolorpicker/>
- w3Schools:** [https://www.w3schools.com/colors/colors\\_picker.asp](https://www.w3schools.com/colors/colors_picker.asp)

Some geeky discussions: <https://www.vis4.net/blog/2011/12/avoid-equidistant-hsv-colors/>

# Fonts Recommendation (Swiss Graphic Design)

## **Sans Serif ()**

This is **Arial** designed for Windows but also works well on Mac

This is **Acumin** (from Adobe designed in 1989)

This is **Courier** (looks like industrial IBM typewriter)

**This is Futura, Bauhaus aesthetic from 1927**

This is **Helvetica** developed in 1957, has been adopted by industry

This is **Univers** font in bold, developed in

This is **Univers Condensed** often used in book publishing

# Schneiderman's Data Visualization Design (Interaction Design)

**Overview:** Gain an overview of the entire collection

**Zoom :** Zoom in on items of interest

**Filter:** filter out uninteresting items

**Details-on-demand:** Select an item or group and get details when needed

**Relate:** View relationships among items

**History:** Keep a history of actions to support undo, replay, and progressive refinement

**Extract:** Allow extraction of sub-collections and of the query parameters

# Between Function & Abstraction

**PURE FUNCTION** < ----- Interesting approach is somewhere between the two ----- > **TOTAL ABSTRACTION**

# Exploratory Design Rules

- Study previous projects at <https://vislab.mat.ucsb.edu/courses.html>
- Doodles (critical quick bridge from idea to image)
- Make brief code sketches
- Plan your time schedule so that you have time to REDO. Each new version is better than the previous one!

# Doodles

# Miriah Meyer (<https://miriah.github.io/projects/>)

## MODELS FOR VISUALIZATION DESIGN

### Making Data Visual

Practical guidance for translating data into insightful visualizations.  
*related material:* [book18]

### Rigor and Knowledge Construction

How visualization designers (can) construct rigorous knowledge.  
*related material:* [infovis20] [infovis19] [cga18]

### Visualization Design Research

Models that describe what visualization design researchers do and the design decisions they make.  
*related material:* [beliv16] [infovis14] [iv13] [leo13] [cga13] [beliv12] [infovis12] [visweek10]

### Workshops

Participatory design workshops for discovering visualization opportunities.  
*related material:* [beliv20] [infovis18] [methods]

## DESIGN STUDIES

Projects that target specific, real-world, data analysis challenges.  
*related material:* [Trevo] [ImplicitError] [Graffinity] [BubbleNet] [WeaVER] [Poemage] [ShotViewer] [PoemViewer] [MulteeSum] [Pathline] [Mizbee]

## CRITICAL DATA VISUALIZATION

### Words Matter

Critique of 'chartjunk' as misaligned and inappropriate for vis research.  
*related material:* [altvis21]

### Data Hunches

Valuing personal knowledge in visual analysis.  
*related material:* [preprint]

## VISUALIZATION OF PERSONAL DATA

### The Personal Informatics Analysis Gap

Three-year study with asthmatic families that reveals opportunities for visualization.  
*related material:* [vis21] [ubicomp18] [lcn18]

### AQ&U

Empowering citizens to reason about air quality using networks of low-cost sensors.  
*related material:* [enviro20] [envres20] [ubicomp18] [lcn18] [cityvis18] [website]

## RAPID PROTOTYPING WITH DATA

### Reshaping Graphs

Tool for representing, reshaping, and reimaging data as a graph.  
*related material:* [vast19] [software]

### Iterating Between Tools

Model that describes how to bridge between generative and drawing tools, and Hanpuku, a tool that bridges D3 and Illustrator.  
*related material:* [infovis16] [software]

### How Designers Design with Data

Results of a qualitative study that describe how designers use data and existing tools to create infographics.  
*related material:* [avi14]

## DIGITAL HUMANITIES

### Visualizing Poetry

Visual encoding of poetic devices for poets.  
*related material:* [infovis15] [eurovis13]  
*software:* [poemage] [poemviewer]

### RhymeDesign

A formalism for analyzing sonic devices in poetry.  
*related material:* [cif15] [software]

## VISUALIZATION OF BIOLOGICAL DATA

### inSite

Interactive viewer for comparing patterns of binding sites across multiple genomics regions.  
*related material:* [software]

### MulteeSum

Exploration tool that supports the comparison of multiple gene expression data sets defined both spatially and temporally.  
*related material:* [infovis10] [software]

### Pathline

Tool that visualizes temporal gene expression data over multiple molecular pathways and across multiple species.  
*related material:* [eurovis10] [software]

### MizBee

Browser that enables analysis of comparative genomics data through visualization across multiple scales.  
*related material:* [infovis09] [software]

# Data Visualization Topics

Visualization, exploration & analytics techniques for various data types; e.g., stream, spatial, graph  
Human-in-the-loop processing  
Human-centered databases  
Data modeling, storage, indexing, caching, prefetching & query processing for interactive applications  
Interactive & human -centered machine learning  
Interactive data mining  
User -oriented visualization; e.g., recommendation, assistance, personalization  
Visualization & knowledge; e.g., storytelling  
Progressive analytics  
In-situ visual exploration & analytics  
Novel interface & interaction paradigms  
Visual representation techniques; e.g., aggregation, sampling, multi-level, filtering  
Scalable visual operations; e.g., zooming, panning, linking, brushing  
Scientific visualization; e.g., volume visualization  
Analytics in the fields of scholarly data, digital libraries, multimedia, scientific data, social data, etc.  
Immersive visualization  
Interactive computer graphics  
Setting-oriented visualization; e.g., display resolution/size, smart phones, visualization over networks  
High performance, distributed & parallel techniques  
Visualization hardware & acceleration techniques  
Linked Data & ontologies visualization  
Benchmarks for data visualization & analytics  
Case & user studies  
Systems & tools

# 3D Visualization Fundamentals
